

A. Go to: <https://transfer.pcloud.com/>

**B. To and From information
(detail below)**

The screenshot shows the pCloud Transfer website. At the top center is the pCloud logo and the text "pCloud Transfer". Below this is a large white box with a document icon and a plus sign. Inside the box, it says "Send large files up to 5GB" and "It's 100% free, no registration required!". Below that, it says "Drag and drop or" and "Click here to add files". To the right of this box is a form with the following fields: "Send to *" with a sub-label "Recipients' emails" and "Up to 10 recipients"; "From *" with a sub-label "Your email" and "Up to 10 recipients"; and "Message" with a sub-label "Optional" and "500 left". A large blue button labeled "SEND FILES" is at the bottom right of the form. Below the form is a footer with copyright information and social media icons for Facebook, Google+, Twitter, and LinkedIn. Three orange arrows point to specific parts of the interface: one to the "Click here to add files" link, one to the "Send to *" field, and one to the "SEND FILES" button.

C. Load File

D. Send file

email details:

- 1. email to: agni72003@yahoo.com**
- 2. You email address**
- 3. Optional message**

Send to * **agni72003@yahoo.com**

Recipients' emails

From * **[your email address](#)**

Up to 10 recipients

Your email

Message **[stop mo files, etc.](#)**

Optional

500 left
